WARNING:

We don't have all the answers.

We're still asking questions.

We can't give you a magical formula. We're still experimenting.

We can't offer an app or a system or a program because real change happens from within.

What are we working on next?

1. Teaching and assessing speaking and writing
2. Getting teachers and students more oriented to the digital world
3. Integrating more digital tools in our teaching
4. Getting feedback to evaluate learning and teaching (answer garden)
